Address: Giza -Egypt

Military status: Finished

Brief

Software Engineer with more than **13 years** of experience in all phases of the software development cycle, business requirement analysis, software design, and software testing mainly in **PHP** , **MySql** , **Sql Server** , **Laravel** , **React** , **Design Patterns, Solid Principles, Git, HTML5** , **CSS3** , **JavaScript** , **Typescript**, **Bootstrap** , **Gulp Js , Material Ui , Tailwind CSS**

I want to work in an environment that provides opportunities for professional development and enables me to learn more about dealing with difficult and critical situations.

Roles

Drive engineering strategy, delivery excellence, and organizational growth.
Establish engineering standards, best practices, and technical governance.
Partner with cross-functional stakeholders to align technology execution with business objectives.
Mentor engineers and future leaders through coaching, performance management, and career development.
Optimize team productivity, resource planning, and development processes.
Champion innovation, continuous improvement, quality, security, and operational excellence.

EDUCATION

Bachelor of Computer Science : Faculty of Engineering in Shoubra (2004 – 2009)

• **Grade** : Very Good

WORK HISTORY

Etax Jul 2023 until Now

Development Lead

- Lead the Development team.
- Identify skill gaps and drive workforce development, succession planning, and continuous learning initiatives.
- Establish and enforce engineering standards, development processes, and best practices to ensure consistency and scalability.
- Oversee software delivery lifecycle, ensuring commitments are met while maintaining quality, security, reliability, and performance standards.
- Collaborate closely with Product Management, Architecture, QA, DevOps, and business stakeholders to align priorities and execution plans.
- Manage team capacity, resource allocation, and delivery planning.
- Provide technical leadership by supporting architecture decisions, solution design reviews, risk assessment, and escalation management.
- Monitor engineering KPIs, delivery metrics, team productivity, system health, and technical debt to drive informed decision-making.
- Lead continuous improvement initiatives across development methodologies, tools, workflows, and operational practices.
- Foster a culture of accountability, ownership, collaboration, innovation, and engineering excellence.
- Support recruitment, talent acquisition, technical interviews, and organizational growth planning.

Skills: Laravel – Sql server- PHP - Object Oriented Programming (OOP) - SOLID Design Principles - Software Design Patterns - Docker - Microservices - JavaScript - RabbitMQ - GraphQL –Redis - Debugging with PHP- Vue Js -React.js – GIT - REST APIs-Team management

IVAS Jan 2018 until Jun 2023

Team Lead

- Lead the Development team.
- Review the code to make sure that matching best practices , and name conventions.
- Support team in complicated tasks
- Make deep and full testing for all new projects
- Handle recruitment
- Good background in Linux development and administration.
- Sending regular updates about project status
- Building reusable code and libraries for future use.
- Have a strong technical background and experience in leading a team of developers
- Responsible for managing the team's progress
- Ensuring that projects are delivered on time and to a high standard
- Providing technical guidance and support to all team members.
- Prioritize and manage workload.
- Ability to identify and translate business needs into technical requirements for successful project delivery.

Skills: Laravel – MySQL- PHP - Object Oriented Programming (OOP) - SOLID Design Principles - Software Design Patterns

iVAS Jan 2016 to Dec 2017

Senior Software Engineer

- Participates in all phases of the software development cycle, business requirement analysis, software design, and software testing.
- work on "VAS" value-added service for web apps and mobile apps like call tones "rbts" and web push contents.
- Designs and develops relational database systems and their web interfaces.
- Provide written status reports & documentation for end users.
- Drawing up test strategies, stories, and test cases to test applications.
- Resolve technical issues through debugging, research, and investigation.
- Troubleshoot, test, and maintain the core product software and databases to ensure strong optimization and functionality.
- Follow industry best practices.
- Develop and deploy new features to facilitate related procedures and tools if necessary.
- Ensure the quality of the developed applications.
- Write clean, well designed code.
- Developing applications using laravel framework.

Skills: PHP – MySQL – Laravel- Object-Oriented Programming (OOP) - JavaScript - Bootstrap– CSS3 – HTML5 - SASS - jQuery - Google Maps –GIT- REST APIs

---

SadaCode Jan 2015 to Dec 2015

Senior PHP Developer

• Developing web applications using the CakePHP framework.

Skills: PHP – MySQL – CakePHP – GIT- REST APIs – HTML – CSS –Java script - bootstrap

---

Edigits Jan 2014 to Dec 2014

Senior PHP Developer

• Developing web applications using Laravel framework and WordPress CMS.

Skills: PHP – MySQL – Laravel- WordPress – GIT- REST APIs – HTML – CSS –Javascript - bootstrap

---

UKprosolutions Jan 2013 to Dec 2013

PHP Web Developer

• Developing web applications using the YII framework.

Skills: PHP – MySQL – YII--HTML- CSS – Javascript - GIT- REST APIs - bootstrap

---

SKILLS

- **Experience With :**

PHP - MySQL – Sql Server - Laravel - React - OOP - Design patterns - Solid Principles - MVC - RESTful & SOAP Apis - GIT - Graph QL - Docker - Redis - Google Maps - HTML - HTML5 - CSS - CSS3 – JavaScript - ESC6 - Bootstrap - jQuery - jQuery Ui - AJAX - JSON - YII framework - Cakephp framework - Codeignitor framework

- **Basic Of :**
  MicroServices - Rabbit MQ - GitHub Actions –XML - SASS - familiar with Linux - Vue JS – Next js - Node js - No Sql (Mongo) - CMS like wordpress

LANGUAGE

Arabic	Naive
English	Very Good
